**Part B.**

**Think and Discuss: Making Personal Connections**

How does your classroom or school setting affect your mood (feelings) and attitude?

How could your classroom or school setting be altered in order to improve students' attitude towards learning and towards themselves?

What setting do you find most uplifting and satisfying? Why?

What season of the year do you least enjoy? Why?

What setting do you find most frightening or threatening? Why?

Think of different environments and the moods and attitudes they provoke. (Examples: doctor's and dentist's offices, your work environment, athletic environments, store and mall environments, church, synagogue, mosque, etc.)
